OBJECTIVE

Accomplished Software Engineer (.NET Full Stack) with 3+ years of experience designing, developing, and deploying secure, high-performance enterprise applications using .NET Core, ASP.NET, C#, React.js, and Microsoft SQL Server. Skilled in RESTful API architecture, Azure DevOps, CI/CD automation, and SQL optimization, delivering scalable, business-driven solutions that enhance productivity and user experience. Proven success in process automation, improving system efficiency by 30% and reducing manual workflows by 80%. Adept at Agile collaboration, system design, and data security through encryption and role-based access control.

SKILLS

Programming Languages: C#, Java, JavaScript, HTML, CSS, VB.NET

Frameworks & Libraries: .NET Core, ASP.NET, Entity Framework, React.js, DevExtreme, Ajax

Front-end Technologies: React.js, Bootstrap, jQuery

Backend & APIs: ASP.NET Web API

Database & Security: Microsoft SQL Server, Data Encryption, Access Control, Role-Based Permissions

Cloud & Deployment: Azure, Azure DevOps, CI/CD Pipelines

Version Control: Git, GitHub

Other Competencies: Performance Optimization, REST API Architecture, System Design, WPF, Winforms

WORK EXPERIENCE

Nous Infosystems | Aug 2025 - Present | Bangalore, India

Software Developer

- Led Agile ceremonies and sprint planning, improving delivery predictability by **25%** through better coordination.
- Enhanced core banking modules in C#, .NET, and SQL Server, boosting system efficiency by **40%**.
- Optimized business logic and SQL queries, reducing transaction time by **30%** and improving responsiveness.

Wipro PARI Engineering and Services | Mar 2023 - Jun 2025 | Pune, India

Software Developer

- Developed enterprise project management systems (MPT, ExDM, PrDM) using C# and VB.NET, Web API, and SQL Server for automation and scalability.
- Automated CCPM scheduling, buffer tracking, and RFQ workflows, improving delivery accuracy and reducing delays.
- Optimized SQL queries and implemented dependency injection and clean architecture to enhance UI speed and reliability.
- Streamlined project workflows through automation, cutting manual effort by **30%** across engineering and planning teams.

EDUCATION

MCA(Master of Computer Application)

T John College Bangalore

CGPA:8.4

2021 – 2023

Bangalore

PROJECTS

Phoenix – Core Banking Application

Tech Stack: Tech Stack: C#, .NET, SQL Server

- Contributed to the development and maintenance of core banking modules by implementing business logic and enhancing backend functionality using **C# and .NET**.
- Optimized **SQL queries and transaction workflows**, resolving production issues and improving system performance and reliability for banking operations.

Execution Data Management (ExDM) – BOM & Buffer Control

Tech Stack: C#, Web API, SQL Server, DevExtreme

- Developed and enhanced modules for BOM release, buffer management, and item tracking to streamline engineering workflows.
- Improved UI responsiveness and data accuracy across production modules, ensuring reliable BOM control and faster user operations.

Network File Manager and Remote Installer

Tech Stack: C#, WinForms, WPF, PsExec

- Built a Windows application for secure file operations with real-time progress tracking and user-friendly controls.
- Integrated remote software installation via PsExec with role-based access control, enabling secure deployments across networked systems.

Weather Forecast App

Tech Stack: React JS, REST APIs

- Created a responsive weather forecast app with global 5-day coverage using real-time API integration.
- Designed an intuitive UI with live updates and error handling for reliable and accurate weather insights.

CERTIFICATES

- SQL (Advanced) – HackerRank
- Data Structures & Algorithms – AccioJob

DECLARATION

I hereby declare that all the details provided here are true to best of my knowledge
